# FURQAN AHMED

Full Stack Developer

With 4 years of hands-on experience, I specialize in both frontend and backend development, focusing on creating intuitive user interfaces (UI) and seamless user experiences (UX). I excel in JavaScript and TypeScript for frontend design, utilizing CSS, Bootstrap, and Tailwind CSS to create responsive and visually appealing interfaces. On the backend, I leverage Python and MongoDB to build robust and efficient applications. Additionally, my expertise in AWS cloud services ensures the scalable and secure deployment of web applications.
